

Meteorologists, Scientists Explain Why There Is ‘No Climate Emergency’

Larry Bell Endowed professor (highest academic award given) at the University of Houston "I care about how climate hysteria, and how misinformation, drives policy. And these policies are driving our foundational bedrock policies that determine our economic well-being. They determine our national defense mastery—we won't run a Navy on ethanol. We're not going to run an Air Force on extension cords. It's just absolutely insane. People think of climate as science. No, it's not. It's the big lever of government. It's big globalism. And it ain't favoring the U.S. "There's absolutely nothing more impacting, nothing more effective, I think, than leveraging the climate scare."

If they can scare you they can control you...Have to ask whose in charge of planet earth? God or man and if man has taken the place of God, watch out he will do all he can to take charge of your life because he is god of planet earth. So called Climate change, Global warming is the tool of control to scare you into submission. Here is what they are saying....

National Public Radio--Catastrophic floods in eastern Libya killed at least 5,100 people, according to local authorities. The disaster comes after a string of deadly floods around the world this month, from China to Brazil to Greece. In every case, extremely heavy rain was to blame. The enormous loss of life on multiple continents reinforces the profound danger posed by climate-driven rain storms, and the need for better warning systems and infrastructure to protect the most vulnerable populations. From Climate change

When the dead don't stay buried ***Climate change isn't just creating havoc for the living. It's coming for our dead. Great deluges of rain submerge graves and markers. Picture***

Thousands are feared dead in Libya, where two dams burst following torrential rains. In Greece, entire towns in the Thessalian plain are underwater from the same storm that also devastated parts of Turkey and Bulgaria. In Asia, Hong Kong and southern China saw extreme rainfall and flooding in recent days. Dozens of people died in flooding in southern Brazil, and catastrophic flooding hit Spain, too, in recent weeks. "The fact that you're seeing these extreme events — record-breaking events, record-breaking temperatures — really suggests that these events are being exacerbated by climate change

Leominster Mass In less time than a movie double-feature, enough water fell to wash out roads and train tracks, deluge homes and businesses in several feet of

Climate Change: Fact or Fraud

water, and force evacuations— the consequences of flash flooding that experts say is a hallmark of climate change. Picture

Biden video

Green video

After the flood God said....*Gen 8:21 "I will never again curse the ground on account of man, for the intent of man's heart is evil from his youth; and I will never again destroy every living thing, as I have done. 22 "While the earth remains, Seedtime and harvest, And cold and heat, And summer and winter, And day and night Shall not cease."*

Psalm 36:6 Your righteousness is like the highest mountains; Your judgments are like the deepest sea. O LORD, You preserve/save/deliver man and beast. Berean Standard

Colossians 1:17 He is before all things, and in Him all things hold together/establish-facts "lining up" w/ each other to support something.

*Psalm 135:6-7 The LORD does all that pleases Him in the heavens and on the earth, in the seas and in all their depths. He causes the clouds to rise from the ends of the earth. He generates the lightning with the rain and brings forth the wind from His storehouses. Berean Standard **Hydrologic Cycle***

Psalm 104:1-35 is all about God creating & taking care of planet earth

"Who is this that darkens counsel, questioning my authority and wisdom By words without knowledge? Job 38:33-37 Do you know the laws of the universe? Can you use them to regulate the earth? 34 "Can you shout to the clouds and make it rain? 35 Can you make lightning appear and cause it to strike as you direct? 36 Who gives intuition to the heart and instinct to the mind? 37 Who is wise enough to count all the clouds? Who can tilt the water jars of heaven

*Hebrews 1:3 And He is the radiance of His glory and the exact representation of His nature, and **upholds** all things by the word of His power. When He had made purification of sins, He sat down at the right hand of the Majesty on high— **Uphold**--keep from falling speaking of God (the Son) the preserver of the universe **Hebrews 1:3***

Frank Bergman August 14, 2023 Slaynews Joe Biden is "close" to signing an executive order to declare a "climate emergency," granting the Democrat president sweeping new powers to enforce lockdowns to "save the planet" from "global warming," a public policy think tank is warning. According to Heartland Institute, "the signs that Biden will declare a "climate emergency"-- "gas rationing, restrictions on electricity use, and limits on air travel."

Climate Change: Fact or Fraud

Place limits on [meat and dairy consumption](#) to meet the “[Net Zero](#)” goals of the [globalist green agenda](#) The Heartland Institute says insiders Biden working with the [United Nations](#). UN’s website updated with a new “climate emergency” page. “The science is clear,” the UN [website](#) states. “The world is in a state of climate emergency, and we need to shift into emergency gear.” **Joe Biden says climate change ‘is even more frightening than a nuclear war’** [Play Video](#)

On July 27, Secretary General António Guterres [said](#), “Climate change is here. It is terrifying. And it is just the beginning. The era of global warming has ended; the era of global boiling has arrived. The air is unbreathable. The heat is unbearable.” [Un sec gen video](#)

Humanity’s burning of fossil fuels has emitted enough greenhouse gases (GHGs) to significantly alter the composition of the atmosphere and average world temperature has risen between 1.1 and 1.2°C=33-34 F “We have the solutions we need and many will reduce emissions, contribute to climate adaptation

”The news comes as the corporate media has been [ramping up reports](#) on recent heatwaves by linking the hot weather to “climate change.” Biden revealed that the federal government is “preparing the military” to “deal with the climate stuff. new temperature numbers, issued August 15 by NOAA (National Oceanic & Atmospheric Administration), the justification Biden needs.

African Arguments news-- Addis Ababa faces growing climate change risks like heat, drought and floods, study warns

The “melting in Antarctica and the supposed subsequent sea level rise” and the Maui wildfires will be cited [Heartland Institute](#). Biden planning to declare a “climate emergency” Democrats and corporate media to make a declaration. Democrat Rep. Cori Bush (D-MO) on social media blame the wildfires in Hawaii on “climate crisis” “climate crisis is here” and is “killing people.”

Sen. Jeff Merkley (D) Scientists are clear that climate chaos wreaking havoc “We need to take action immediately or else it will get even worse setting devastating wildfires in Maui,” Rep. Barbara Lee (D-CA) climate is in crisis, and it’s not up for debate We must declare a climate emergency & act before more lives are lost.”

There are important lessons to be learned from this tragedy. We are resolved to keep our communities safe as climate issues intensify here and around the globe. We invite others to do the same with us. President and CEO HECO Shelee Kimura

Hawaii governor agrees climate change 'amplified the cost of human error' on Maui fires. Climate change “amplified” the failures of officials to act properly on the Maui wildfires, Hawaii Democratic Gov. Josh Green suggested on Sunday. While appearing on CBS’ **“Face the Nation,”** Green discussed what some people have considered critical mistakes by both local officials & private companies regarding the disaster. Tho Green acknowledged failures in decisions made “in the moment” by these actors, he also remarked that these mistakes were aggravated by climate change.

Climate Change: Fact or Fraud

CBS host Margret Brennan asked "So just to be clear, when you're talking about global warming, are you saying climate change amplified the cost of human error?"? Green replied **"Yes. It did".**

When we don't want to acknowledge our failures we play the blame game.

"Science is based on observational evidence, together with logic, to make sense of the evidence BTW President Donald Trump disputes "global warming" Good for him!

Princeton, MIT Scientists Say EPA Climate Regulations are Based on a 'Hoax' Physicist, meteorologist testify that the climate agenda is 'disastrous' for US

Two prominent climate scientists taken on (EPA) on cutting carbon dioxide (CO₂) emissions in electricity generation, arguing ***"will be disastrous for the country, for no scientifically justifiable reason."***

William Happer, professor in physics at Princeton University, & Richard Lindzen, professor of atmospheric science at Massachusetts Institute of Technology (MIT), claims by EPA of scientific facts but are political opinions & speculative models consistently proven to be wrong.

"The unscientific method of cherry-picking data and omitting voluminous contradictory data, is commonly employed by the EPA
"None of the studies provides scientific knowledge, none provides any scientific support.

"All of the models that predict catastrophic global warming fail the key test of the scientific method: they grossly overpredict warmings versus actual data. The scientific method proves there is no risk that fossil fuels and carbon dioxide will cause catastrophic warming and extreme weather."

Climate models EPA is using have been consistently wrong for decades in predicting actual outcomes

Modeled climate predictions (average shown by red line) versus actual observations **Pic temp variations—90's overprediction embarrassment**

Climate Change: Fact or Fraud

Embarrassment in the *“90’s U.S. Department of Energy, knew very well then that the models were overpredicting warming by a huge amount.” 1975-2020++*

EPA has grossly overstated the harm from CO₂, ignoring the benefits of CO₂ to life on Earth.

EPA regulations are “arbitrary and capricious,” failed to consider an important aspect of the problem, *cherry-picked data* to support a pre-ordained conclusion,” *Pic CO₂ temp flux Blue-CO₂; Red-Temp Precambrian--today*

“Millenniums of CO₂ and temperature data contradict the theory that high levels of CO₂ will cause catastrophic global warming.”

They present CO₂ and temperature data indicating much higher temperatures and levels of CO₂ than are observed today, with little correlation between the two-current *CO₂ levels are at a low point historically.*

CO₂ levels (blue) and temperatures (red) over time, indicating little correlation and current levels of both at historic lows.

140 [parts per million] increase in CO₂ since the Industrial Age is trivial compared to CO₂ changes over the geological history of life on Earth,”

EPA fail to consider CO₂ & fossil fuels are essential to life on earth.

“Increased levels CO₂ create more food worldwide, more food for people in drought-stricken areas. “Increases in carbon dioxide over the past two 200 yrs since the Industrial Revolution, from about 280 parts per million to about 420 ppm, caused an approximate 20 percent increase in the food available to people worldwide, as well as increased greening of the planet and a benign(*beneficial, helpful*) warming in temperature.”

Synthetic fertilizers (dotted line) have increased crop yields dramatically since their introduction. *Pic syn fertilizers-yield 1866-today*

More CO₂ in the atmosphere leads to more plant growth and higher farming yields-*dotted line*. Synthetic fertilizers are derivatives of natural gas responsible for nearly half the world’s food production today.

“Net zero” goals would reduce CO2 emissions by more than 40 gigatons per year, reducing the food supply proportionally.

The world's population is increasingly dependent on synthetic fertilizers, a derivative of fossil fuels. **Pic population growth-fertiizers**

disregarding benefits of CO2, EPA’s emission rules & global warming narrative are based on flawed data. **Bill Gates cut down trees—Israel ¼ bill planted changed atmosphere/climate-wasteland to garden of eden**

Recent reports have suggested that Bill Gates’s organization, ***Breakthrough Energy***, is investing \$6.6 million into a project led by ***Kodama Systems***, which is purportedly aimed at cutting down 70 million acres of forests, primarily in the Western United States, and burying the felled trees. The project organizers argue that planting dead trees can reduce global warming by preventing the alleged release of carbon into the atmosphere. They intend to achieve this by using “earthen vaults,” which are dry and oxygen-free spaces designed for carbon sequestration, rather than utilizing the trees for conventional purposes such as timber for housing.

Since 1901, we’ve planted an incredible 250 million ¼ bill trees in Israel. And the results have been transformative and breathtaking. Once a desert-nation, today Israel has blossomed into a garden oasis.

Teaching physics at Princeton, Mr. Happer’s for decades focused on atmospheric radiation and atmospheric turbulence, his inventions used by astronomers and in national defense.

“Radiation in the atmosphere is my specialty,” Mr. Happer said, ***“and I know more about it than, I would guess, any climate scientists.”***

His expertise ***“involves much of the same physics that’s involved in climate, and none of it is very alarming”*** he says.

The global warming narrative argues that as people burn fossil fuels, they emit higher concentrations of carbon dioxide into the earth’s atmosphere, which creates a “greenhouse effect,” trapping the sun’s radiation and warming the earth. global warming models fail to take into account, according a phenomenon called “saturation,” or the diminishing effect of CO2 in the atmosphere at higher concentrations.

Climate Change: Fact or Fraud

The current concentrations of CO₂, around 400 parts per million, it decreases the radiation to space by about 30 percent, compared to what you would have if you took it all away," enough to cause quite a bit of warming of the earth, and thank God for that; it helps make the earth habitable, along with the effects of water vapor and clouds. Evaporation, condensation, precipitation, collection

Double CO₂ from 400 to 800 will take a long time, you decrease radiation to space only 1 percent--how hard it is for additional carbon dioxide to make a difference to the radiation to space. That's what's called saturation, and it's been well-known for 100 years."

The "greenhouse effect" of additional CO₂ doesn't increase in proportion to the amount of CO₂ added. [Pic greenhouse CO₂](#)

Why is global warming overblown w/ large discrepancies between global warming models and actual observations. The data has been disingenuously manipulated to fit the climate change narrative.

[Example is the temperature record," records published 20 years ago in United States warmest years mid-1930s. Pic heat waves in 30's](#)

Data today is no longer true. People in charge reduced the temperatures of the 30's & increased the temperature of more recent measurements."

A graph created by the EPA titled "[Record Warm Daily Temperatures Are Occurring More Often,](#)" An example of misleading data to support theory of global warming.

EPA chart does not show 'daily temperatures instead shows a 'ratio' which appears to create the impression temperatures are steadily rising." [Pic EPA Figures don't lie but liars sure can figure](#)

By contrast, the scientists presented a table that indicates significantly higher temperatures in the 1930s than today. [Pic of 30's temp](#)

These data indicate that heat waves were more severe in the 1930s than today. (Source: [EPA before numbers manipulated](#)).

The Scientific 'Consensus' for Climate Change--Proponents of global warming- it's "**settled science**" nearly all scientists agree global warming is real result of human activity.

NASA statement—97 percent—agree that humans are causing global warming and climate change.

Cornell University states " 99.9% of peer-reviewed scientific papers agree that climate change is mainly caused by humans

But consensus isn't science "If it disagrees with experiment-it's wrong."

"Science has never been made by consensus," Mr. Happer said. "The way you decide something is true in science is you compare it with experiment or observations.

"It doesn't matter if there's a consensus. It doesn't matter if a Nobel Prize winner says it's true; if it disagrees with observations, it's wrong. climate models clearly are wrong because they don't agree w/ observations." "**Consensus is the business of politics.**"

"Science, on the contrary, requires only one investigator who happens to be right, which means that he or she has results that are verifiable by reference to the real world," "In science, consensus is irrelevant. What are relevant are reproducible results."

Initial predictions of climate disasters had New York flooded by now, no ice left at the North Pole, England would be like Siberia by now. Nothing that they predicted actually came true. They say it to keep the money coming--changed 'global warming' to 'climate change.'"

Hawaii should have disappeared according to their models-**Tantillus** should be beach front property **But pictures of Hawaii 1900's and today**

According to consensus in published literature cited by Cornell University, some experts counter that academic publications routinely reject any submissions that question the global warming narrative.

Climate is a self-regulating process & that more clouds form when temperatures rise, resulting in a compensatory cooling effect.

“We are totally awash in pseudoscience.” the population that has been brainwashed into thinking this is an **existential threat** to the planet. they don’t have the background to know they are being deceived, but they are being deceived.”

World Bank September 2022 \$31.7 billion that fiscal year to help countries address climate change. United States is projected to spend about \$500 billion to fight climate change over the next decade

Rom 1:22 KJV Professing themselves to be wise, they became fools, 2Thes 2:9b ..& Satan, with all power & signs and lying wonders, 10 and with all the deception of wickedness for those who perish, because they did not receive the love of the truth so as to be saved. 11 And for this reason God will send upon them a deluding influence so that they might believe what is false, 12 in order that they all may be judged who did not believe the truth but took pleasure in wickedness

Satan uses fear to control—tyrants do the same but God does the opposite...

2Tim 1:7 NKJ For God has not given us a spirit of fear, but of power and of love and of a sound mind.

Rom 8:15 For you have not received a spirit of slavery leading to fear again, but you have received a spirit of adoption as sons by which we cry out, “Abba! Father!”

2Tim 3:1-5 1 But realize this, that in the last days difficult times will come. 2 For men will be lovers of self, lovers of money, boastful, arrogant, revilers, disobedient to parents, ungrateful, unholy, 3 unloving, irreconcilable, malicious gossips, without self-control, brutal, haters of good, 4 treacherous, reckless, conceited, lovers of pleasure rather than lovers of God; 5 holding to a form of godliness, although they have denied its power; and avoid such men as these.

Matt 24:33 even so you too, when you see all these things, recognize that He is near, right at the door. 34 “Truly I say to you, this generation will not pass away until all these things take place. 35 “Heaven and earth will pass away, but My words shall not pass away.

2 Peter 3:7 But by His word the present heavens and earth are being reserved for fire, kept for the day of judgment and destruction of ungodly men.
